

CUSTOM PORTFOLIO CONNECT

Getting started is easy:

- #1. Contact Us at info@ourstudentportfolios.com
- #2. Review and sign agreement
- #3. Provide a list of students you wish to invite to begin using the tool

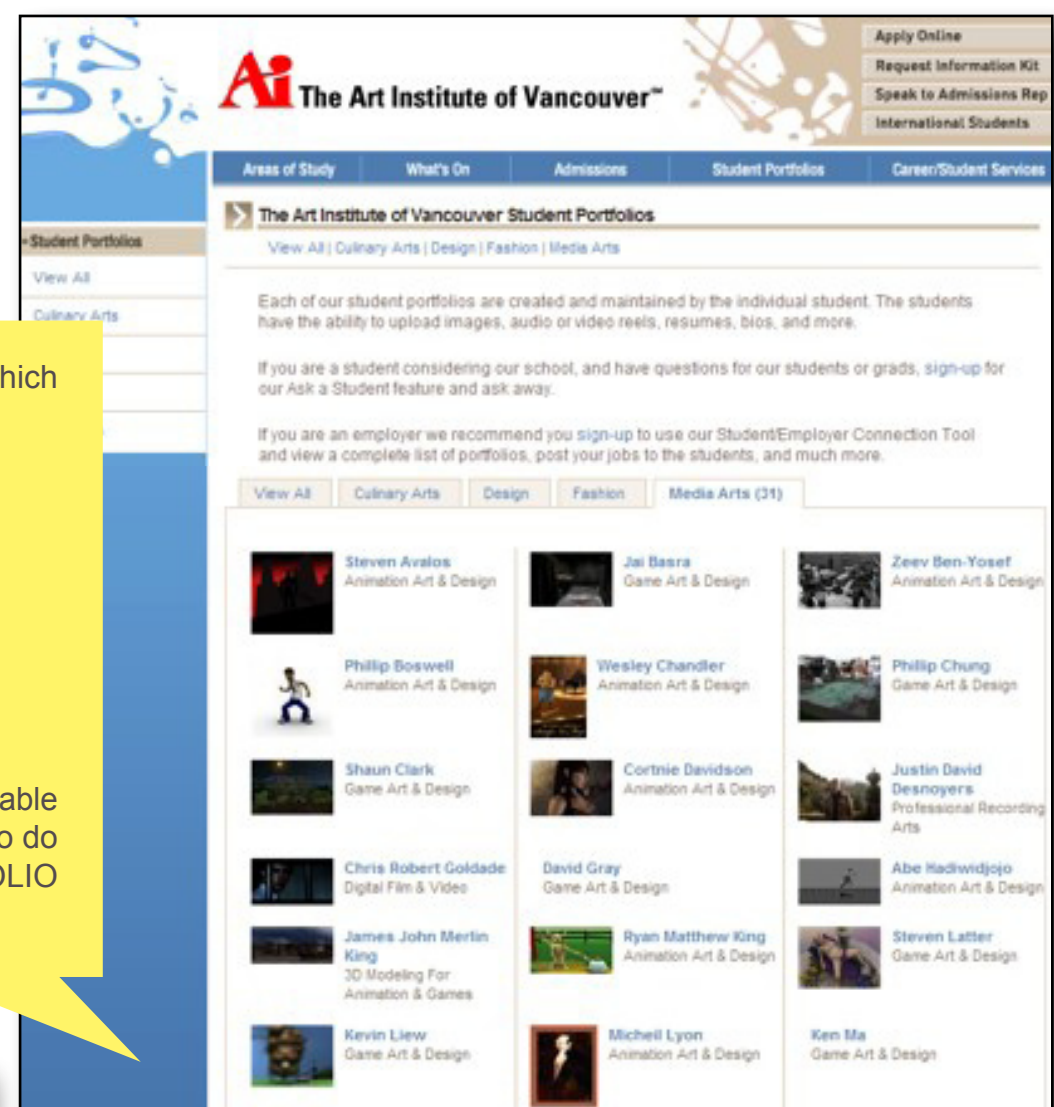

If you need site content to help engage prospective students visiting your own school site then **CUSTOM PORTFOLIO CONNECT** is for you.

The same self-managed searchable student portfolio content found in all of the applications, but this one gets served directly onto your school website.

Our proprietary tool allows us to continue to host and manage your portfolios on our servers and mirror the full functionality directly onto a page on your school website.

All that is needed is a single URL your school supplies us i.e. yourschoolname.com/portfolios and we will point our search tool and your portfolios to this page.

No need to open up firewalls, or lean on your IT department, your students and **CUSTOM PORTFOLIO CONNECT** take care of it all.

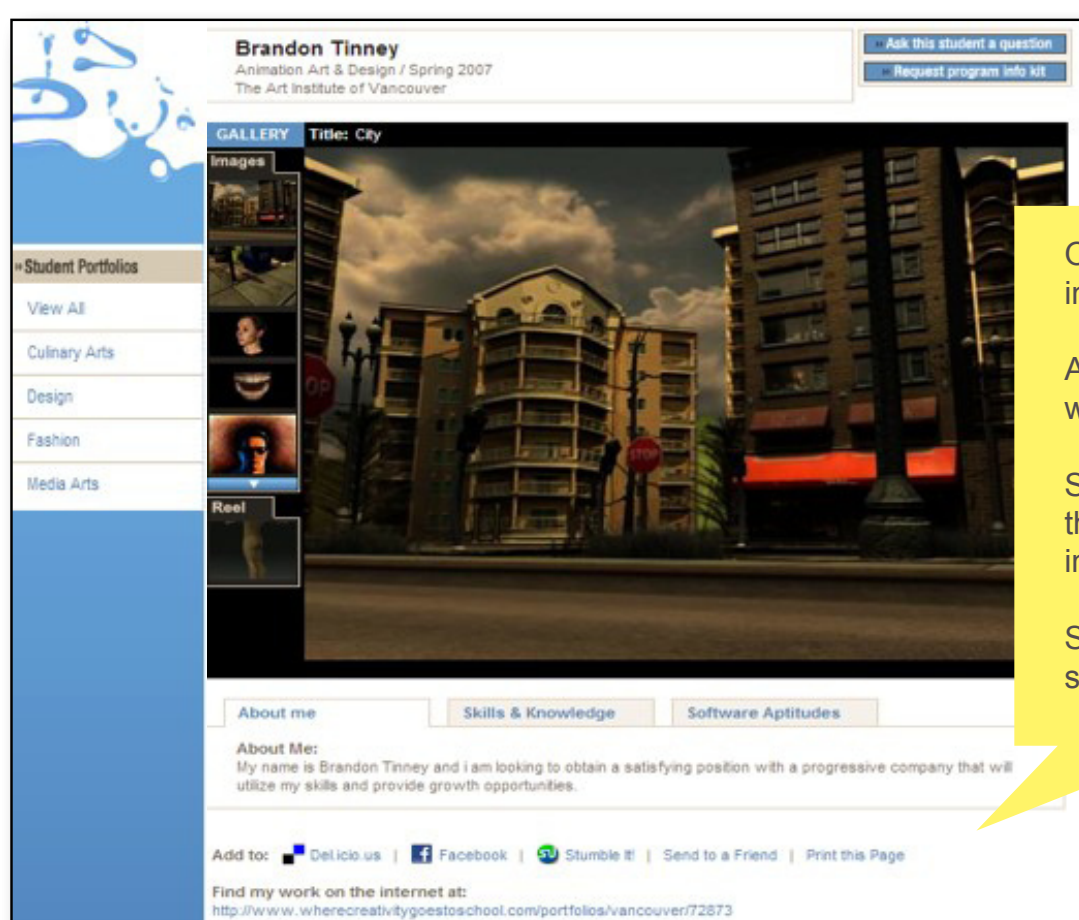

Empower your students and grads by giving them a self-managed portfolio tool, which allows them to upload their reels, images, resumes, and more.

Again, all your school portfolios are now searchable by all, or any combination of:

- Campus locations
- Areas of study
- Show only those which include a resume
- Show most recently updated first
- Show only faculty portfolios results

What could be better than supplying examples of student work and make it all searchable for your site visitors on your very own school site - and the only person who has to do the work is the student or grad, the rest is taken care of by **CUSTOM PORTFOLIO CONNECT** - now that's easy, dynamic, and engaging content.

Once you import a list of student names and email addresses you wish to invite to use, the students and the application takes care of the rest.

An email invitation is automatically sent out to those students you imported with their login information and instructions on how to get started.

Students can now begin to build their online portfolios, including uploading their reels, images, resumes and so much more and have them searchable inside your own school site.

Site visitors will be impressed by the efforts your school makes to market your students to not only employers, but to the rest of the world.
